# Training – Object Detection

Der Mensch zeigt, was wichtig ist und worauf geachtet werden muss.

The screenshot displays a web application interface for object detection training. On the left is a dark sidebar with navigation options: HOME, ACTIONSCRIPTS, CAMERAS, DATA SETS, DETECTORS, LABELLING JOBS, PROCESSING TASKS, and SETTINGS. Below these is a dropdown menu for 'MoonVision (id: 1)' and a 'Logout' button. The central panel shows a list of training jobs with columns for job name and count:

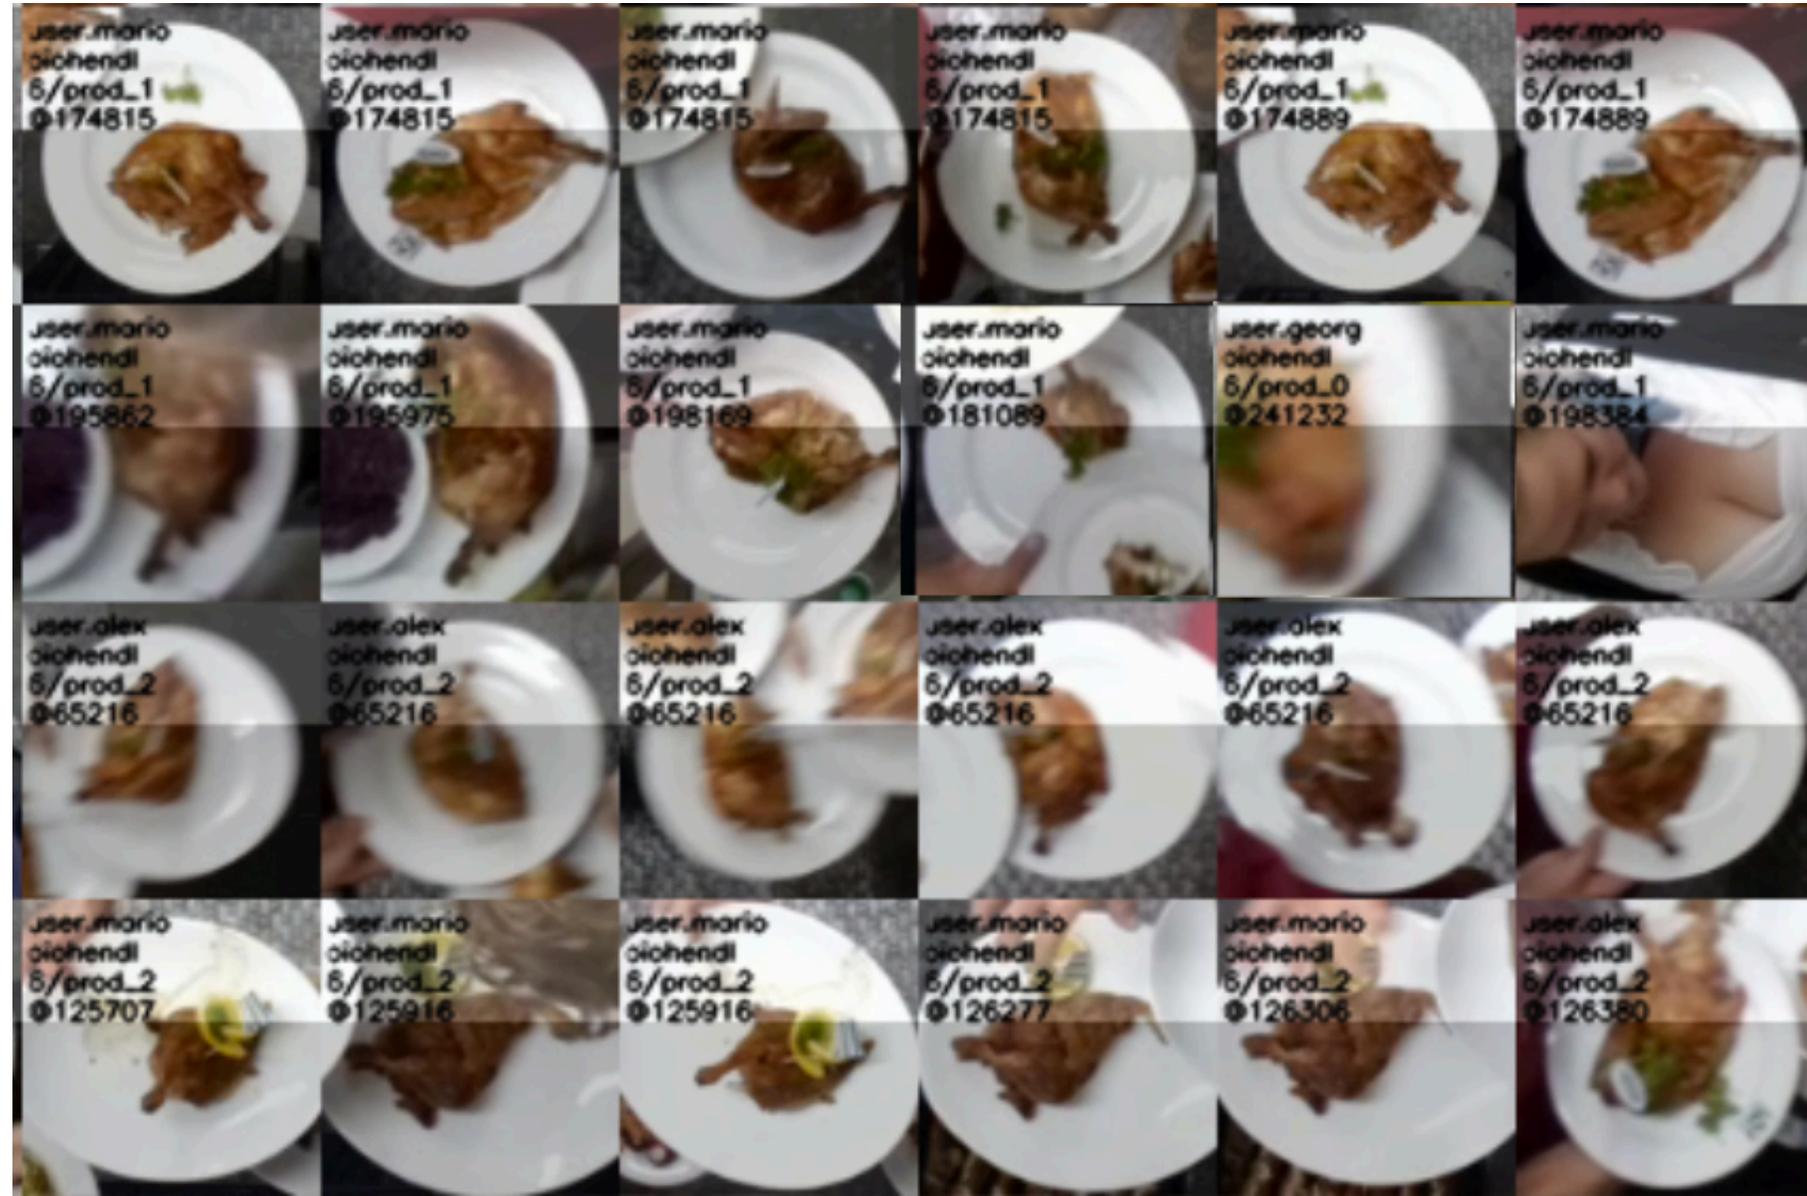

Job Name	Count
side.twix	50748
side.manner.schnitten	50746
side.auer	50745

At the top of the central panel, there are navigation icons (undo, redo, crop, circle, hexagon, pencil) and a 'Cancel' button. Below the list is a large image of a tray containing several items: a pink box of 'Manner' wafers, a green bag of 'AUER Baumstämme' wafers, a Twix bar, and a Bounty bar. The 'Manner' box is highlighted with a pink bounding box, and the Twix bar, AUER bag, and Bounty bar are highlighted with green bounding boxes. At the top right of the image area is a 'Save & Continue' button. A small question mark icon is visible in the bottom right corner of the page.

# Überprüfen und Monitoring

Der Mensch kontrolliert  
regelmäßig, die Ergebnisse der  
Maschine.

Bessert Fehler aus.

# Danke

- Freude mich auf die Gespräche!
